improvements

Introducing Snowbird Power Systems™

This summer, Snowbird unveiled Snowbird Power Systems, including a new and improved cogeneration plant. Since 1987, Snowbird has been the only ski resort in North America to operate a cogeneration plant: a system that takes waste heat created by electricity-producing engines and uses it to heat buildings and facilities.

The new plant saves 62,000 dekatherms of natural gas a year—the equivalent of removing the carbon dioxide emissions from burning over 4 million pounds of coal. Snowbird Power Systems covers up to 100% of Snowbird's energy needs including The Cliff Lodge, Snowbird Center, the Aerial Tram and other chairlifts.

welcome

Summer is hot. Too hot. But it's cooler at Snowbird. And not just the temps. Whether it's hiking up Hidden Peak, flying down the Mountain Coaster or swimming on top of The Cliff Lodge, we are anything but average. All of the best parts of summer, up here, they're just better.

It's time to ditch the city. Ditch the crowds. The heat. The Traffic. We'll see you at the Bird.

Family-Friendly Hikes

Snowbird's extensive network of trails provides many opportunities for outdoor enjoyment. Whether you are exploring right from the Snowbird Center, enjoying the wildflowers in Mineral Basin or walking down after an Aerial Tram ride to Hidden Peak, you'll find hiking in the Wasatch Mountains to be a rewarding experience.

- Walk the Observation Point Trail to view interpretive panels about the local area and relax on a deck with great down-canyon views.
- Hike Dean's Delight to enjoy a lovely dirt trail that weaves through groves of trees and over the cascading Gad Valley stream.
- Take the Aerial Tram to Hidden Peak then hike Peruvian Gulch Road or Wildflower Trail to the Tunnel, an interpretive walk through the mountain itself. Then ride down on the Peruvian Chairlift (height restrictions apply).
